***Election/Restriction***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I: The species of a blister package opener as shown in Figures 1-5.

Group II: The species of a blister package opener as shown in Figures 6-9.

Group III: The species of a blister package opener as shown in Figures 10-14.

Group IV: The species of a blister package opener as shown in Figures 15-20.

Group V: The species of a blister package opener as shown in Figures 21-26.

Group VI: The species of a blister package opener as shown in Figures 27-30.

Group VII: The species of a blister package opener as shown in Figures 31-32.

Group VIII: The species of a blister package opener as shown in Figures 33-35.

Group IX: The species of a blister package opener as shown in Figure 36.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 3728

Applicant is advised that a reply to this requirement **must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added otherwise the reply is considered improper**. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Applicant's representative on 7/27/06 to request an oral election to the above restriction requirement, but did not result in an election being made.
